

Classified Index,

Volume 12, August 2006–May 2007

Author Index

- Allen, David S., *Geometry: More Than Just Shapes*. Sept. 2006, 100–101.
- Andre, Robert, and Lynda R. Wiest, *Using Sorting Networks for Skill Building and Reasoning*. Feb. 2007, 308–11.
- Austin, Richard A., Denisse R. Thompson, and Charlene E. Beckmann, *Locusts for Lunch: Connecting Mathematics, Science, and Literature*. Nov. 2006, 182–89.
- Barger, Rita, and Martha Haehl, *Guitars, Violins, and Geometric Sequences*. Apr. 2007, 462–66.
- Barker, David D., James E. Tarr, Barbara J. Reys, and Rick Billstein, *Selecting High-Quality Mathematics Textbooks*. Aug. 2006, 50–54.
- Barlow, Angela, *Computing Quartiles: It's All in the Cards!* Feb. 2007, 316–18.
- Bay-Williams, Jennifer M., *Showing Your Work: Beyond Following Steps*. Feb. 2007, 338–39.
- Beasley, Mary Lou, and Andy Reeves, *Advanced Paint by Numbers*. Apr. 2007, 447, 451.
- , *Burgers and Birds; Favorite Flavors*. Nov. 2006, 198, 203.
- , *Buy the Gallon or Buy the Pound? A Taxing Day!* Feb. 2007, 324, 323.
- , *A Cartoon for Teachers*. Aug. 2006, 31, 35–36.
- , *Cookies for Rookies; Doggy Geometry*. May 2007, 503, 515.
- , *100th Birthday Party: Time Flies!* Dec. 2006/Jan. 2007, 262, 259.
- , *What's Your Point? A Pizza Pizza*. Sept. 2006, 107, 99.
- Beasley, Mary Lou, Donna Hardy Watson, and Andy Reeves, *The Cost of an Import: Dirty Glasses*. Oct. 2006, 149, 155.
- Beasley, Mary Lou, Larry Lesser, and Andy Reeves, *A Round This Date in Time: Pizza Pi, Anyone?* Mar. 2007, 383, 387.
- Beckmann, Charlene E., Denisse R. Thompson, and Richard A. Austin, *Locusts for Lunch: Connecting Mathematics, Science, and Literature*. Nov. 2006, 182–89.
- Bennett, Curtis D., Mary J. DeYoung, James J. Rutledge, and Elaine Young, *Dialogue: A Route to ACT-ive Learning*. Aug. 2006, 37–39.
- Bergner, Jennifer A., and Randall E. Groth, *Building an Online Discussion Group for Teachers*. May 2007, 530–35.
- Bezuszka, Stanley J., and Margaret J. Kenney, *Just Five Does It: Using Five Numbers to Make Patterned Squares*. Apr. 2007, 436–41.
- Billstein, Rick, James E. Tarr, Barbara J. Reys, and David D. Barker, *Selecting High-Quality Mathematics Textbooks*. Aug. 2006, 50–54.
- Bolte, Linda A., *Weaving Plaids Based on $(a \pm b)^2$* . Apr. 2007, 430–34.
- Boone, Tracy, Rose Mary Zbiek, and Shari Ann Reed, *Cell Phone Coverage Area: Helping Students Achieve in Mathematics*. Feb. 2007, 300–307.
- Borst, Robert W., and Vickie Rorvig, *A National Mathematics Curriculum for the United States: Two Perspectives*. Sept. 2006, 70–72.
- Britton, Jill, *Escher in the Classroom*. Apr. 2007, 480.
- Brod, Mary Jean, and Shannon R. Overbay, *Magic with Mayan Math*. Feb. 2007, 340–47.
- Brownell, William A., *The Revolution in Arithmetic*. Aug. 2006, 27–30.
- Buckner, Stefanie, Leah P. McCoy, and Jessica Munley, *Probability Games from Diverse Cultures*. Mar. 2007, 394–402.
- Buerman, Margaret, *The Algebra of the Arches*. Mar. 2007, 360–65.
- Burkhart, Jerry, *Integer Target: Using a Game to Model Integer Addition and Subtraction*. Mar. 2007, 388–92.
- Calasanz-Kaiser, Agnes, Gregory W. Condon, and Miriam F. Landesman, *What's on Your Radar Screen? Distance-Rate-Time Problems from NASA*. Aug. 2006, 6–12.
- Chamberlin, Michelle T., and Judith Zawojewski, *A Worthwhile Mathematical Task for Students and Their Teachers*. Sept. 2006, 82–87.
- Chenulu, Syamala, *Teaching Mathematics through the Art of Kolam*. Apr. 2007, 422–28.
- Cherry, Mary L., Faith H. Wallace, and Karen K. Clark, *How Come? What If? So What? Reading in the Mathematics Classroom*. Sept. 2006, 108–15.
- Clark, Karen K., Mary L. Cherry, and Faith H. Wallace, *How Come? What If? So What? Reading in the Mathematics Classroom*. Sept. 2006, 108–15.
- Condon, Gregory W., Miriam F. Landesman, and Agnes Calasanz-Kaiser, *What's on Your Radar Screen? Distance-Rate-Time Problems from NASA*. Aug. 2006, 6–12.
- Court, Nathan, *Mathematics in the History of Civilization*. Oct. 2006, 142–48.
- Danielson, Christopher, and Michele Luke, *If I Only Had One Question: Partner Quizzes in Middle School Mathematics*. Nov. 2006, 206–13.
- Davis, Edward J., *A Model for Understanding in Mathematics*. Nov. 2006, 190–97.
- Davis, Jon D., and Sally Kent, *Mathematics and Science: The Beginning of a Beautiful Relationship*. Sept. 2006, 103–6.
- Davis, Robert B., *Emotion and Thought*. May 2007, 522–29.
- DeYoung, Mary J., Curtis D. Bennett, James J. Rutledge, and Elaine Young, *Dialogue: A Route to ACT-ive Learning*. Aug. 2006, 37–39.
- Dornoo, Michael D., and Janet Hart, *Similar Shapes and Ratios*. Nov. 2006, 222–24.
- Fehr, Howard F., *Psychology of Learning in the Junior High School*. Dec. 2006/Jan. 2007, 283–87.
- Flockhart, Daniel J., *Fantasy Football and Mathematics Score Touchdowns with Students*. Sept. 2006, 74–80.
- Flores, Charity A., *How to Buy a Car* 101. Oct. 2006, 161–64.
- Frost, Janet Hart, and Michael D. Dornoo, *Similar Shapes and Ratios*. Nov. 2006, 222–24.
- Fugitt, Jamie, *A Dozen Ways to Celebrate Mathematician of the Month*. Feb. 2007, 333–37.
- Gleichowski, Rosemarie Reeves, and Charles A. (Andy) Reeves, *Engaging Contexts for the Game of Nim*. Dec.

- 2006/Jan. 2007, 251-55.
- Gregg, Diana Underwood, and Jeff Gregg, Measurement and Fair-Sharing Models for Dividing Fractions. May 2007, 490-96.
- Gregg, Jeff, and Diana Underwood Gregg, Measurement and Fair-Sharing Models for Dividing Fractions. May 2007, 490-96.
- Groth, Randall E., and Jennifer A. Bergner, Building an Online Discussion Group for Teachers. May 2007, 530-35.
- Grover, Barbara W., and Laura J. Moss, Not Just for Computation: Basic Calculators Can Advance the Process Standards. Dec. 2006/Jan. 2007, 266-73.
- Haehl, Martha, and Rita Barger, Guitars, Violins, and Geometric Sequences. Apr. 2007, 462-66.
- Hanebrink, Tamela, and Candide Walton, Talk Isn't Cheap. Dec. 2006/Jan. 2007, 260-62, 288.
- Hawes, Kathy, Using Error Analysis to Teach Equation Solving. Dec. 2006/Jan. 2007, 238-42.
- Hedin, David S., Connecting the Mobiles of Alexander Calder to Linear Equations. Apr. 2007, 452-61.
- Iuzzolino, Carol A., Mathematics through the Eye of the Camera. Mar. 2007, 356-58.
- Jarvis, Daniel, Mathematics and Visual Arts: Exploring the Golden Ratio. Apr. 2007, 467-73.
- Johnson, Art, and Kit Norris, The Beginnings of the Metric System. Dec. 2006/Jan. 2007, 228-31.
- Judd, Wallace, Instructional Games with Calculators. Feb. 2007, 312-14.
- Kasmer, Lisa, and Ok-Kyeong Kim, Using "Prediction" to Promote Mathematical Reasoning. Feb. 2007, 294-99.
- Kastberg, Signe E., and Wendy Otoupal-Hylton, Learning from Voices in Classrooms. Oct. 2006, 156-60.
- Kenney, Margaret J., and Stanley J. Bezuska, Just Five Does It: Using Five Numbers to Make Patterned Squares. Apr. 2007, 436-41.
- Kent, Sally, and Jon D. Davis, Mathematics and Science: The Beginning of a Beautiful Relationship. Sept. 2006, 103-6.
- Kersaint, Gladis, and Denisse R. Thompson, University Faculty—Making Classroom Connections. May 2007, 488-89.
- Kersaint, Gladis, and Edward Mooney, State Fair. Sept. 2006, 102, 99.
- Kidd, Margaret L., Be Resolute about Absolute Value. May 2007, 518-21.
- Kim, Kyoung-Tae, and Ji-Eun Lee, A Mathematical Private Eye. Mar. 2007, 406-10.
- Kim, Ok-Kyeong, and Lisa Kasmer, Using "Prediction" to Promote Mathematical Reasoning. Feb. 2007, 294-99.
- Koellner, Karen, and Faith Wallace, Alternative Uses for Junk Mail: How Environmental Print Supports Mathematical Literacy. Feb. 2007, 326-32.
- Landesman, Miriam F., Gregory W. Condon, and Agnes Calasanz-Kaiser, What's on Your Radar Screen? Distance-Rate-Time Problems from NASA. Aug. 2006, 6-12.
- Lawrence, Ann, Introduction to Volume 12. Aug. 2006, 3.
- Lee, Ji-Eun, and Kyoung-Tae Kim, A Mathematical Private Eye. Mar. 2007, 406-10.
- Lesser, Larry, Andy Reeves, and Mary Lou Beasley, A Round This Date in Time; Pizza Pi, Anyone? Mar. 2007, 383, 387.
- Lewis, Leslie D., Irrational Numbers Can "In-Spiral" You. Apr. 2007, 442-46.

Classified Index

Algebra/Algebraic Thinking

- The Algebra of the Arches. Mar. 2007, 360-65.
- Anticipating Student Responses to Improve Problem Solving. May 2007, 504-11.
- Be Resolute about Absolute Value. May 2007, 518-21.
- Connecting the Mobiles of Alexander Calder to Linear Equations. Apr. 2007, 452-61.
- Counting Dots and Measuring Area: Rich Problems from Japan. Nov. 2006, 214-19.
- Engaging Contexts for the Game of Nim. Dec. 2006/Jan. 2007, 251-55.
- Guitars, Violins, and Geometric Sequences. Apr. 2007, 462-66.
- Irrational Numbers Can "In-Spiral" You. Apr. 2007, 442-46.
- 100th Birthday Party: Time Flies! Dec. 2006/Jan. 2007, 262, 259.
- Solving Quadratic Equations by Completing Squares. Mar. 2007, 403-5.
- Teaching Mathematics through the Art of Kolam. Apr. 2007, 422-28.
- Using Error Analysis to Teach Equation Solving. Dec. 2006/Jan. 2007, 238-42.
- Weaving Plaids Based on $(a \pm b)^2$. Apr. 2007, 430-34.
- What's on Your Radar Screen? Distance-Rate-Time Problems from NASA. Aug. 2006, 6-12.

Assessment

- If I Only Had One Question: Partner Quizzes in Middle School Mathematics. Nov. 2006, 206-13.
- A Model for Understanding in Mathematics. Nov. 2006, 190-97.
- Pasta Symmetry. May 2007, 516-17.
- Using Error Analysis to Teach Equation Solving. Dec. 2006/Jan. 2007, 238-42.

Using Thought Bubble Pictures to Assess Students' Feelings about Mathematics. Aug. 2006, 14–21.

Combinatorics

Burgers and Birds; Favorite Flavors. Nov. 2006, 198, 203.

Communication

A Dozen Ways to Celebrate Mathematician of the Month. Feb. 2007, 333–37.

Learning from Voices in Classrooms. Oct. 2006, 156–60.

Mathematics and Visual Arts: Exploring the Golden Ratio. Apr. 2007, 467–73.

Showing Your Work: Beyond Following Steps. Feb. 2007, 338–39.

Computation/Arithmetic

Alternative Uses for Junk Mail: How Environmental Print Supports Mathematical Literacy. Feb. 2007, 326–32.

Burgers and Birds; Favorite Flavors. Nov. 2006, 198, 203.

Do You Understand Your Algorithms? Aug. 2006, 42–47.

Instructional Games with Calculators. Feb. 2007, 312–14.

Integer Target: Using a Game to Model Integer Addition and Subtraction. Mar. 2007, 388–92.

Irrational Numbers Can "In-Spiral" You. Apr. 2007, 442–46.

Measurement and Fair-Sharing Models for Dividing Fractions. May 2007, 490–96.

Number Golf. Oct. 2006, 151, 155.

Understanding Aztec and Mayan Numeration Systems. Aug. 2006, 55–62.

Understanding the Properties of Arithmetic: A Prerequisite for Success in Algebra. Aug. 2006, 22–25.

Connections/Applications

Alternative Uses for Junk Mail: How Environmental Print Supports Mathematical Literacy. Feb. 2007, 326–32.

The Beginnings of the Metric System. Dec. 2006/Jan. 2007, 228–31.

Be Resolute about Absolute Value. May 2007, 518–21.

Changing Sizes. Feb. 2007, 348–49.

Connecting the Mobiles of Alexander Calder to Linear Equations. Apr. 2007, 452–61.

Cookies. Mar. 2007, 374–78.

Counting Dots and Measuring Area: Rich Problems from Japan. Nov. 2006, 214–19.

Covering the Pool. Aug. 2006, 40–41.

Dialogue: A Route to ACT-ive Learning. Aug. 2006, 37–39.

Elizabeth's Long Walk. Dec. 2006/Jan. 2007, 263–65.

Fantasy Football and Mathematics Score Touchdowns with Students. Sept. 2006, 74–80.

How Come? What If? So What? Reading in the Mathematics Classroom. Sept. 2006, 108–15.

How to Buy a Car 101. Oct. 2006, 161–64.

Introduction to Volume 12. Aug. 2006, 3.

Locusts for Lunch: Connecting Mathematics, Science, and Literature. Nov. 2006, 182–89.

A Mathematical Private Eye. Mar. 2007, 406–10.

Mathematics and Science: The Beginning of a Beautiful Relationship. Sept. 2006, 103–6.

Mathematics and Visual Arts: Exploring the Golden Ratio. Apr. 2007, 467–73.

Mathematics, Art, Research, Collaboration, and Storytelling: The High M.A.R.C.S. Project. May 2007, 497–502.

Using Alice in Wonderland to Teach Multiplication of Fractions. Dec. 2006/Jan. 2007, 244–50.

Weaving Plaids Based on $(a \pm b)^2$. Apr. 2007, 430–34.

What's on Your Radar Screen? Distance-Rate-Time Problems from NASA. Aug. 2006, 6–12.

Curriculum

The Algebra of the Arches. Mar. 2007, 360–65.

A National Mathematics Curriculum for the United States: Two Perspectives. Sept. 2006, 70–72.

Selecting High-Quality Mathematics Textbooks. Aug. 2006, 50–54.

Editorial

Curriculum Focal Points for Pre-K–Grade 8 Mathematics: A Quest for Coherence. Oct. 2006, 150.

Enrichment/Recreational Math

Beyond Su Doku. Oct. 2006, 165–69.

Hitting the Bull's-Eye: A Dart Game Simulation Using Graphing Calculator Technology. Sept. 2006, 116–22.

Instructional Games with Calculators. Feb. 2007, 312–14.

Integer Target: Using a Game to Model Integer Addition and Subtraction. Mar. 2007, 388–92.

Mathematics and Visual Arts: Exploring the Golden Ratio. Apr. 2007, 467–73.

Pasta Symmetry. May 2007, 516–17.

Probability Games from Diverse Cultures. Mar. 2007, 394–402.

Weaving Plaids Based on $(a \pm b)^2$. Apr. 2007, 430–34.

Equity and Diversity

The Beginnings of the Metric System. Dec. 2006/Jan. 2007, 228–31.

A Dozen Ways to Celebrate Mathematician of the Month. Feb. 2007, 333–37.

Magic with Mayan Math. Feb. 2007, 340–47.

Probability Games from Diverse Cultures. Mar. 2007, 394–402.

Using Thought Bubble Pictures to Assess Students' Feelings about Mathematics. Aug. 2006, 14–21.

Estimation/Approximation

(See *Number Sense*)

Functions

Engaging Contexts for the Game of Nim. Dec. 2006/Jan. 2007, 251–55.

Geometry

(See also *Measurement*)

Cell Phone Coverage Area: Helping Students Achieve in Mathematics. Feb. 2007, 300–307.

Christie's Cake. Mar. 2007, 379, 387.

Counting Dots and Measuring Area: Rich Problems from Japan. Nov. 2006, 214–19.

Escher in the Classroom. Apr. 2007, 480.

Geometry: More Than Just Shapes. Sept. 2006, 100–101.

Learning from Voices in Classrooms. Oct. 2006, 156–60.

Making Waves. Oct. 2006, 171–74.

Master of Tessellations: M. C. Escher, 1898–1972. Apr. 2007, 476–79.

The Mathematics of Radial Designs. Apr. 2007, 474–75.

Pasta Symmetry. May 2007, 516–17.

A Round This Date in Time: Pizza Pi, Anyone? Mar. 2007, 383, 387.

Similar Shapes and Ratios. Nov. 2006, 222–24.

History

- The Beginnings of the Metric System. Dec. 2006/Jan. 2007, 228–31.
A Dozen Ways to Celebrate Mathematician of the Month. Feb. 2007, 333–37.
Emotion and Thought. May 2007, 522–29.
The Future of Fractions. Mar. 2007, 366–69.
Introduction to Volume 12. Aug. 2006, 3.
Let the 100th Anniversary Begin. Aug. 2006, 26.
Magic with Mayan Math. Feb. 2007, 340–47.
Mathematics and Visual Arts: Exploring the Golden Ratio. Apr. 2007, 467–73.
Mathematics in the History of Civilization. Oct. 2006, 142–48.
The Revolution in Arithmetic. Aug. 2006, 27–30.
Some Thoughts about Fractions. Mar. 2007, 370–73.

Home/Community/Business Relations

- Data Analysis and Statistics in the Middle School. Aug. 2006, 48–49.
Introduction to Volume 12. Aug. 2006, 3.

Humor

- Advanced Paint by Numbers. Apr. 2007, 447, 451.
Burgers and Birds; Favorite Flavors. Nov. 2006, 198, 203.
Buy the Gallon or Buy the Pound? A Taxing Day! Feb. 2007, 324, 323.
A Cartoon for Teachers. Aug. 2006, 31, 35–36.
Cookies for Rookies; Doggy Geometry. May 2007, 503, 515.
The Cost of an Import; Dirty Glasses. Oct. 2006, 149, 155.
100th Birthday Party; Time Flies! Dec. 2006/Jan. 2007, 262, 259.
A Round This Date in Time; Pizza Pi, Anyone? Mar. 2007, 383, 387.

Measurement

- The Beginnings of the Metric System. Dec. 2006/Jan. 2007, 228–31.
Burgers and Birds; Favorite Flavors. Nov. 2006, 198, 203.
Buy the Gallon or Buy the Pound? A Taxing Day! Feb. 2007, 324, 323.
Cell Phone Coverage Area: Helping Students Achieve in Mathematics. Feb. 2007, 300–307.
Christie's Cake. Mar. 2007, 379, 387.
Cookies for Rookies; Doggy Geometry. May 2007, 503, 515.
Finding Areas on Dot Paper. Dec. 2006/Jan. 2007, 274–82.
Guitars, Violins, and Geometric Sequences. Apr. 2007, 462–66.
Locusts for Lunch: Connecting Mathemat-

ics, Science, and Literature. Nov. 2006, 182–89.

- Measuring Tremendous Trees: Discovery in Action. Oct. 2006, 132–39.
100th Birthday Party; Time Flies! Dec. 2006/Jan. 2007, 262, 259.

Modeling

- Solving Quadratic Equations by Completing Squares. Mar. 2007, 403–5.

Number Sense

- Be Resolute about Absolute Value. May 2007, 518–21.
Measurement and Fair-Sharing Models for Dividing Fractions. May 2007, 490–96.
Understanding the Properties of Arithmetic: A Prerequisite for Success in Algebra. Aug. 2006, 22–25.

Number System

- Burgers and Birds; Favorite Flavors. Nov. 2006, 198, 203.
The Future of Fractions. Mar. 2007, 366–69.
Instructional Games with Calculators. Feb. 2007, 312–14.
Some Thoughts about Fractions. Mar. 2007, 370–73.
Using Alice in Wonderland to Teach Multiplication of Fractions. Dec. 2006/Jan. 2007, 244–50.
What's Your Point? A Pizza Pizza. Sept. 2006, 107, 99.

Number Theory

- Dialogue: A Route to ACT-ive Learning. Aug. 2006, 37–39.
Just Five Does It: Using Five Numbers to Make Patterned Squares. Apr. 2007, 436–41.
Multiples of Four. Feb. 2007, 319, 323.
Using Alice in Wonderland to Teach Multiplication of Fractions. Dec. 2006/Jan. 2007, 244–50.
Using Engaging Contexts to Introduce Concepts. Sept. 2006, 123–28.

Patterns

- Just Five Does It: Using Five Numbers to Make Patterned Squares. Apr. 2007, 436–41.
Similar Shapes and Ratios. Nov. 2006, 222–24.
Teaching Mathematics through the Art of Kolam. Apr. 2007, 422–28.

Probability

- Buy the Gallon or Buy the Pound? A Taxing Day! Feb. 2007, 324, 323.

- Computing Quartiles: It's All in the Cards! Feb. 2007, 316–18.
More Than Meets the Eye: An Interdisciplinary Exploration. March 2007, 380–82.
Probability Games from Diverse Cultures. Mar. 2007, 394–402.

Problem Solving/Problem Posing

- Advanced Paint by Numbers. Apr. 2007, 447, 451.
The Algebra of the Arches. Mar. 2007, 360–65.
Anticipating Student Responses to Improve Problem Solving. May 2007, 504–11.
April's Menu of Problems. Apr. 2007, 448–51.
August's Menu of Problems. Aug. 2006, 32–35.
Be Resolute about Absolute Value. May 2007, 518–21.
Burgers and Birds; Favorite Flavors. Nov. 2006, 198, 203.
Buy the Gallon or Buy the Pound? A Taxing Day! Feb. 2007, 324, 323.
A Cartoon for Teachers. Aug. 2006, 31, 35–36.
Changing Sizes. Feb. 2007, 348–49.
Christie's Cake. Mar. 2007, 379, 387.
Cookies. Mar. 2007, 374–78.
Cookies for Rookies; Doggy Geometry. May 2007, 503, 515.
The Cost of an Import; Dirty Glasses. Oct. 2006, 149, 155.
Counting Dots and Measuring Area: Rich Problems from Japan. Nov. 2006, 214–19.
Covering the Pool. Aug. 2006, 40–41.
December/January's Menu of Problems. Dec. 2006/Jan. 2007, 256–59.
Elizabeth's Long Walk. Dec. 2006/Jan. 2007, 263–65.
February's Menu of Problems. Feb. 2007, 320–23.
It's the Thought That Counts: Reflecting on Problem Solving. Dec. 2006/Jan. 2007, 232–37.
Locusts for Lunch: Connecting Mathematics, Science, and Literature. Nov. 2006, 182–89.
Making Waves. Oct. 2006, 171–74.
March's Menu of Problems. Mar. 2007, 384–87.
A Mathematical Private Eye. Mar. 2007, 406–10.
May's Menu of Problems. May 2007, 512–15.
Multiples of Four. Feb. 2007, 319, 323.
November's Menu of Problems. Nov. 2006, 200–203.
Number Golf. Oct. 2006, 151, 155.
October's Menu of Problems. Oct. 2006, 152–55.
100th Birthday Party; Time Flies! Dec. 2006/Jan. 2007, 262, 259.

A Round This Date in Time; Pizza Pi, Anyone? Mar. 2007, 383, 387.
 September's Menu of Problems. Sept. 2006, 96-99.
 Showing Your Work: Beyond Following Steps. Feb. 2007, 338-39.
 Similar Shapes and Ratios. Nov. 2006, 222-24.
 State Fair. Sept. 2006, 102, 99.
 Talk Isn't Cheap. Dec. 2006/Jan. 2007, 260-62, 288.
 The Two-Digit Game. Nov. 2006, 205, 203.
 What's Your Point? A Pizza Pizza. Sept. 2006, 107, 99.

Reasoning

Beyond Su Doku. Oct. 2006, 165-69.
 Similar Shapes and Ratios. Nov. 2006, 222-24.
 Using "Prediction" to Promote Mathematical Reasoning. Feb. 2007, 294-99.

Representation

Be Resolute about Absolute Value. May 2007, 518-21.
 Beyond Su Doku. Oct. 2006, 165-69.
 Computing Quartiles: It's All in the Cards! Feb. 2007, 316-18.
 Counting Dots and Measuring Area: Rich Problems from Japan. Nov. 2006, 214-19.
 Covering the Pool. Aug. 2006, 40-41.
 Data Analysis and Statistics in the Middle School. Aug. 2006, 48-49.
 Dialogue: A Route to ACT-ive Learning. Aug. 2006, 37-39.
 Do You Understand Your Algorithms? Aug. 2006, 42-47.
 Elizabeth's Long Walk. Dec. 2006/Jan.

2007, 263-65.
 Engaging Contexts for the Game of Nim. Dec. 2006/Jan. 2007, 251-55.
 Fantasy Football and Mathematics Score Touchdowns with Students. Sept. 2006, 74-80.
 Finding Areas on Dot Paper. Dec. 2006/Jan. 2007, 274-82.
 Hitting the Bull's-Eye: A Dart Game Simulation Using Graphing Calculator Technology. Sept. 2006, 116-22.
 How Come? What If? So What? Reading in the Mathematics Classroom. Sept. 2006, 108-15.
 Making Waves. Oct. 2006, 171-74.
 Measuring Tremendous Trees: Discovery in Action. Oct. 2006, 132-39.
 More Than Meets the Eye: An Interdisciplinary Exploration. March 2007, 380-82.
 Not Just for Computation: Basic Calculators Can Advance the Process Standards. Dec. 2006/Jan. 2007, 266-73.
 Solving Quadratic Equations by Completing Squares. Mar. 2007, 403-5.
 Talk Isn't Cheap. Dec. 2006/Jan. 2007, 260-62, 288.
 Understanding Aztec and Mayan Numeration Systems. Aug. 2006, 55-62.
 Understanding the Properties of Arithmetic: A Prerequisite for Success in Algebra. Aug. 2006, 22-25.
 Using Alice in Wonderland to Teach Multiplication of Fractions. Dec. 2006/Jan. 2007, 244-50.
 Using Engaging Contexts to Introduce Concepts. Sept. 2006, 123-28.
 Using Sorting Networks for Skill Building and Reasoning. Feb. 2007, 308-11.
 What's on Your Radar Screen? Distance-Rate-Time Problems from NASA. Aug. 2006, 6-12.
 A Worthwhile Mathematical Task for Students and Their Teachers. Sept. 2006, 82-87.

Research

A Mathematical Private Eye. Mar. 2007, 406-10.

Statistics/Data Analysis

Computing Quartiles: It's All in the Cards! Feb. 2007, 316-18.
 Data Analysis and Statistics in the Middle School. Aug. 2006, 48-49.
 More Than Meets the Eye: An Interdisciplinary Exploration. March 2007, 380-82.
 Using Engaging Contexts to Introduce Concepts. Sept. 2006, 123-28.
 Using "Prediction" to Promote Mathematical Reasoning. Feb. 2007, 294-99.

Teachers

Building an Online Discussion Group for Teachers. May 2007, 530-35.
 Introduction to Volume 12. Aug. 2006, 3.
 Measurement and Fair-Sharing Models for Dividing Fractions. May 2007, 490-96.
 More Than Meets the Eye: An Interdisciplinary Exploration. March 2007, 380-82.
 A Worthwhile Mathematical Task for Students and Their Teachers. Sept. 2006, 82-87.

Teaching

Cell Phone Coverage Area: Helping Students Achieve in Mathematics. Feb. 2007, 300-307.
 Computing Quartiles: It's All in the Cards! Feb. 2007, 316-18.
 Connecting the Mobiles of Alexander Calder to Linear Equations. Apr. 2007, 452-61.
 A Dozen Ways to Celebrate Mathematician of the Month. Feb. 2007, 333-37.
 Escher in the Classroom. Apr. 2007, 480.
 Finding Areas on Dot Paper. Dec. 2006/Jan. 2007, 274-82.
 How to Buy a Car 101. Oct. 2006, 161-64.
 Introduction to Volume 12. Aug. 2006, 3.
 Learning from Voices in Classrooms. Oct. 2006, 156-60.
 A Mathematical Private Eye. Mar. 2007, 406-10.
 Mathematics and Visual Arts: Exploring the Golden Ratio. Apr. 2007, 467-73.
 A Model for Understanding in Mathematics. Nov. 2006, 190-97.
 Pasta Symmetry. May 2007, 516-17.
 Psychology of Learning in the Junior High School. Dec. 2006/Jan. 2007, 283-87.
 Relational Understanding and Instrumental Understanding. Sept. 2006, 88-95.
 Solving Quadratic Equations by Completing Squares. Mar. 2007, 403-5.
 University Faculty—Making Classroom Connections. May 2007, 488-89.
 Weaving Plaids Based on $(a \pm b)^2$. Apr. 2007, 430-34.
 A Worthwhile Mathematical Task for Students and Their Teachers. Sept. 2006, 82-87.

Technology

Building an Online Discussion Group for Teachers. May 2007, 530-35.
 Hitting the Bull's-Eye: A Dart Game Simulation Using Graphing Calculator Technology. Sept. 2006, 116-22.
 Not Just for Computation: Basic Calculators Can Advance the Process Standards. Dec. 2006/Jan. 2007, 266-73. □
